

PRESS RELEASE

MARCH 2026

STRUCTURING ENERGY STORAGE PROJECTS IN EMERGING MARKETS

Chana Abrams of Channing Law was honoured to have presented a workshop at the Energy Storage Summit in London on 24 February 2026, titled “Structuring Energy Storage Projects in Emerging Markets”.

The session focused on the contractual spectrum, from the revenue agreement to the EPC / LTSA, considering how the correct structure and allocating risks appropriately impact the tariff, financing terms and EPC / LTSA pricing.

The interactive session with an audience ranging from Ukraine, Nigeria, Germany, U.K. and Turkey provided a forum for exchanging experiences and solutions in structuring energy storage projects.

Many thanks to Jo Wilkinson at Informa for providing Channing Law with this opportunity.
